About US

FAV POLYGON , powered by the FAV FTPY token, aims to capture 40 % of the crypto wallet market share by the end of 2026. This secure, multi- chain, multi-wallet, non-custodial platform is poised to dominate the industry. As the first crypto wallet to use Fireblocks MPC-CMP wallet technology, FAV POLYGON offers custom multiwallet portfolios and simplified presale purchase flow with its hugely exciting Upcoming Tokens portal.

FAV POLYGON

FTPAY OWN WALLET

FAV POLYGON is mobile-first and designed for crypto users who prefer to use their smartphones as their first point of access to crypto dApps. This immediately puts it at an advantage to other wallets, all of which are hampered either by a clunky user experience or reliance on a centralised entity.

FAV POLYGON is self-custody or non-custodial, meaning users hold and control their own funds independent of any dApps they interact with. Living on the user's phone, with the latest security features in place, it's one app to manage your entire crypto portfolio.

Mission & Vision

FAV POLYGON aims to be the easiest and safest crypto wallet to use for investors of any level with the most features, capabilities, and added benefits. With a mission to capture 40 % of the crypto wallet market share by the end of 2026, FAV POLYGON revolutionises the Web3 experience offering competitive benefits for holders.
